

ABOUT MAINE TRADITIONS HARDWOOD FLOORING

Flooring Products:

Maine Traditions Hardwood Flooring produces $\frac{3}{4}$ inch pre-finished and unfinished solid flooring with the traditional values people come to expect from a hardworking family owned business. Our dedication to providing a high quality product, great customer service, and a commitment to building lasting relationships with our customers is what drives us each and every day.

We take pride in producing our products from sustainably managed forest products, some of which have been managed by the family for over 3 generations. It is our mission to maintain our company forests for generations to come, and to promote sound forest practices with those we purchase forest products from. In the spring of 2009 this commitment was taken to the next level with FSC certification of our full flooring program; sawmill operation, and our entire saw-log procurement program. We are extremely excited about telling our customers that what we have done for the past 3 generations has been working, and we look forward to continuing that tradition for many more generations to come.

Our Hardwood flooring is a natural product produced from some of nature's most beautiful offerings. As with anything created from a natural product it will change its beauty with age, in many cases the color hues will become more brilliant with changing tones. When considering hardwood flooring for your home please remember that with age it will change in its natural color hue, whether it be lighter or darker. Your flooring sales person can help explain how the colors will change with time.

We certainly appreciate your interests in our products and hope that the natural product you are choosing for your home will bring you many years of enjoyment.

Classic Collection:

Maine Traditions Classic Collection of flooring, providing tastes in the clear and clean of a premium product, and the character and color of our coastal product. The Classic Collection maintains the quality milling and 10-coat finish that people have come to expect from **Maine Traditions**, providing a richness and beauty that only hardwood floors produce in a home.

The Family Tradition:

Three generations of the Carrier family have worked in northern Maine, all dedicated to producing the highest quality hardwood products. Founded by my grandfather, our Jackman, Maine Company flourished and now employs hundreds of hard working Maine people.

Kennebec Lumber Company, established in 1999 in Solon, Maine, continues the family tradition with our newest product line, Maine Traditions Hardwood Flooring. Kennebec Lumber Company produces world class, high quality hardwood products, manufactured and distributed with personal care and commitment to detail. **Maine Traditions Hardwood Flooring** demands the same care and attention to detail.

Our lumber is cut and milled in Maine, then transformed into flooring of superior Quality. Because the raw material is grown strictly in the Northern woods, the slow growth of the trees produce lumber with unique grain and character. The minerals in the soil create color that enhances the beauty of our flooring.
