

YELLOW BIRCH PREMIUM FLOORING

Maine Traditions

Features

Our Yellow Birch premium floor shows the true clean and clear attributes of the warm creamy yellow color found in yellow birch.

During the production process the Premium Floor is created by removing boards with character and darker colored heartwood producing a grade that shows minimal variations. The grade will show an occasional mineral streak or pin knot, but these are minimized to ensure the quality you expect with a premium floor. Board lengths are restricted to a minimum of 18 inches and an average in the mid 30 inch range.

Yellow Birch Coastal grade floor provides the richest grade for those looking for yellow, brown, and red color contrasts; character, and varying grain patterns.

A very popular grade for those wanting to pull colors together in a room from the walls through the furniture and floor covering, or just to provide diversity in the appearance of the floor. Yellow Birch ranges in color from creamy warm yellow, browns, and rich red heartwood. The varying colors and grain patterns brought to life in this grade provides a spectacular floor for our customers. A minimum of 10 inch boards complete how this grade is produced.
