

EverStrand™ by Mohawk

P.E.T. used to make plastic beverage bottles is a higher-grade material than used in traditional PET carpet. When those discarded

bottles are recycled, they can be processed into fibers that are far superior to lower-grade synthetic fibers used in making other brands of carpet yarns. Our fiber families are responsible to the planet we all share, and Mohawk takes that responsibility very seriously. We **recycle more than three billion plastic bottles each year** — 14,000 every minute — turning each one into gorgeous, eco-friendly EverStrand™ carpet.

P.E.T. provides exceptional stain resistance with superb color clarity. You can trust the way they look, love the way they feel, and have complete assurance in their natural resistance to stains and spills.
