Environmentally Friendly Carpeting Options

Looking for something environmentally friendly? Check out EverStrand™, a carpet fiber that's made from recycled plastic bottles.

And for carpeting that's even more extraordinary learn about SmartStrand® with DuPont™ Sorona® renewably sourced polymer, which uses renewable resources provided by agriculture. Even more impressive, SmartStrand doesn't stain; it's easy to clean with just a little water even with the most stubborn stains like wine, mustard or even bleach.

For us, Earth Day is more than one day out of the year. It's about changing the way we think and incorporating earth-friendly thought into even the way we furnish and design our homes- saving the earth doesn't mean sacrificing style.

Enduring Beauty and Stain-Resistance

Does your home include active kids or playful pets? The durability of Wear-Dated carpet fiber using Scotchgard Advanced Repel Technology might be the right answer for you. Mohawk carpets with the Wear-Dated seal retain the original beauty much longer and alleviate many of the hassles of carpet care.

Scotchgard has always been known and trusted for its ability to repel liquid spills and resist soiling. Now it's been improved to offer even better protection. Exclusive to Mohawk Industries, Scotchgard Protector Advanced Repel Technology provides even more repellency to liquids and enhanced soil protection.

And when you purchase a Mohawk carpet, you get high-quality flooring from one of the world's most trusted brands backed by robust warranties for up to 20 years. Mohawk carpeting offers unique colors, patterns, styles and features.
